Date: June 8, 2015

**Re: Consideration of Proposed Water Main Installation by
Dan River Water, Inc. on Talley Road**

Dan River Water, Inc. has submitted preliminary plans, prepared by William E. Mitchell, P.E., showing the proposed installation of replacement and new water mains along Talley Road. The engineer's report submitted with the preliminary plans indicates that 2,840 LF of 6-inch diameter water main, as well 815 LF of 2-inch diameter water main is proposed for the Talley Road project. The improvements to their system would allow for the possible addition of 26 existing houses as new customers in the project area.

Mike Lemons, Utility Supervisor for Dan River Water, Inc., is requesting that City Council grant approval for the proposed water main installation so that it can be constructed, in accordance with the water purchase agreement between the City of Eden and Dan River Water, Inc.

The plans are available for review in the Engineering Department, and scanned images have been made for your review.

If you have any questions, please do not hesitate to contact me or Mike Lemons prior to the June City Council meeting.

Thanks for reviewing and considering this matter.
