**Re: Consideration of Proposed Booster Pump Station Replacement
by Dan River Water, Inc. on Settlement Loop**

Mike Lemons, Utility Supervisor for Dan River Water, Inc., is requesting that City Council grant approval for the proposed replacement of their booster pump station located on Settlement Loop, between the intersections with Young Road and NC 770. Plans for the new building and minor pipe changes on the lot are being prepared by their engineering firm. Approval of the proposed improvement is being requested in accordance with the water purchase agreement between the City of Eden and Dan River Water, Inc.

The improvements are intended to replace aging equipment and improve the reliability of delivering water to a nearby industrial customer.

Enclosed is a copy of the brief letter from Mike Lemons, and a small sketch showing the proposed location of the new pump house building in relation to their existing pumping station.

It is recommended that the proposed improvements to the Dan River Water, Inc. facility on Settlement Loop be allowed to take place. If you have any questions, please do not hesitate to contact me or Mike Lemons prior to the December City Council meeting.

Thanks for reviewing and considering this matter.
